

Radiation Products Design, Inc.

Item 337-141 Check Source

Instruction Relating To The Handling, Use, Storage and Disposal Of The Radioactive Material

The contents of this package are exempt from NRC or Agreement State licensing requirements.

CAUTION: RADIOACTIVE MATERIAL - NOT FOR HUMAN USE

Introduction into foods, beverages, cosmetics, drugs or medicinals or into products manufactured for commercial distribution is prohibited. Exempt quantities should not be combined.

A. For any source

1. All radioactive materials should be stored in specially designated areas.
2. All work with these materials should be carried out only in authorized areas.

B. For unsealed sources

1. No pipetting should be done by mouth.
2. There should be no smoking or eating within the work area.
3. Hands should be washed after handling radioactive materials.
4. Any spilled material should be wiped up quickly and thoroughly and the contaminated materials transferred to a suitable waste receptacle. The surfaces involved should be washed thoroughly with a suitable detergent.
5. The amount of radioactive materials in this package may be discarded in the standard sewer system. The containers may be discarded in the regular laboratory waste if the radiation caution labeling is removed or defaced.

C. For sealed or plated sources

1. Sources should be handled carefully to avoid breaking the seal (for example scratching the thin window).
2. If the seal appears to be damaged follow decontamination procedure as in B4 above.
3. This small amount of radioactivity may be disposed into regular laboratory waste if the label and wording on the source is defaced.
