**Item 928-150**  
**Kianni Scrotum Cover – Sold 10/Pkg.**

The Kianni Scrotum Cover comfortably covers and secures the scrotum when a clamshell type testicular shield is being used. (Items 928-200, 928-250 and 928-300).

The Kianni Scrotum Cover is a bag made of elastic netting and threaded at the opening with an elastic drawstring. This makes it easy for the patient or health care personnel to place the cover over the entire scrotum area. The netting provides a barrier between the scrotum skin and the cold shield, which helps prevent the testicles from retracting due the cold. The elasticity of the netting allows for expansion many times the size of the actual cover size of 3" x 3".

Suggested usage is dependent on the sanitary condition of the patient. The cover can be changed and disposed of daily or can be used for up to one week per patient.

The cover is not intended to be cleaned and reused.

**Do not use cover on more than one patient.**
