CT-MAG RULERS

1. CT-MAG Rulers consist of 22 point scales and have been expanded to 40 cm for use with CT and MRI images. Match a scale with the corresponding 5 cm magnification scale for the cut of interest. If the first scale reads less than or greater than 5 cm, select the next scale which increases or decreases the corresponding measurement of 5 cm.
2. Please note, scale identification numbers 3.5 to 14 are for identification purposes only and do not indicate any magnification or demagnification.
3. The corresponding scale for that cut will allow measurement any place on the image.
